

BOARD Arosio Design

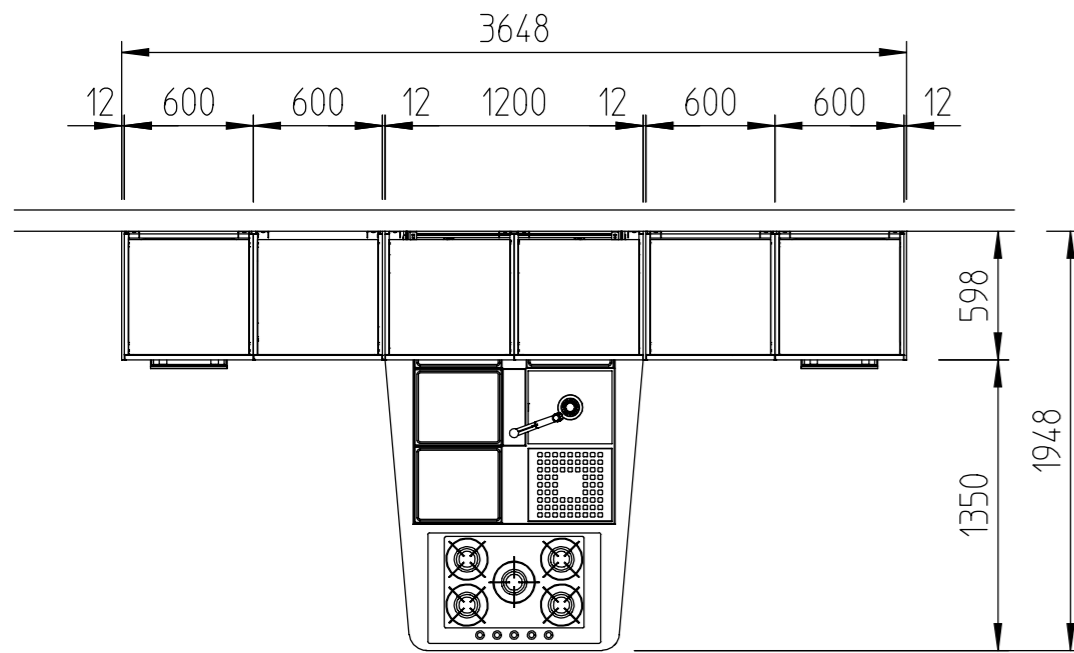

**snaidero**

CUCINE PER LA VITA

Board vuole rappresentare una risposta industriale ad un'evoluzione dell'edilizia abitativa contemporanea, sempre più orientata a proporre e costruire ambienti piccoli, spazi condivisi, "liberi" nella configurazione di interni, che diventano luminosi e aperti, privi di vincoli funzionali e tesi verso nuove qualità ambientali. Una risposta, quella di Snaidero, che parla il linguaggio di un design concreto, "smart", eccellente nelle soluzioni estetiche e funzionali, ma al contempo calato sulle esigenze di spazi ridotti che richiedono soluzioni industriali flessibili, personalizzabili e in grado di accompagnare la persona lungo tutto il percorso della sua vita.

*Board aims to offer an industrial solution to the evolution in the contemporary housing industry, which tends to increasingly propose and build compact environments, shared spaces with freely configured interiors that are bright and open, without any functional constraints and geared towards new levels of environmental quality. Snaidero's solution reflects a tangible design concept featuring excellent aesthetic and functional solutions, yet tailored to limited space requirements that call for flexible and highly customisable industrial solutions.*
